

Cardioid Subwoofer Array 80

This is a study of 2) QRX-218-S set up for 80Hz cardioid.
(Spaced at 42", delayed at 3.15ms, and out of polarity)

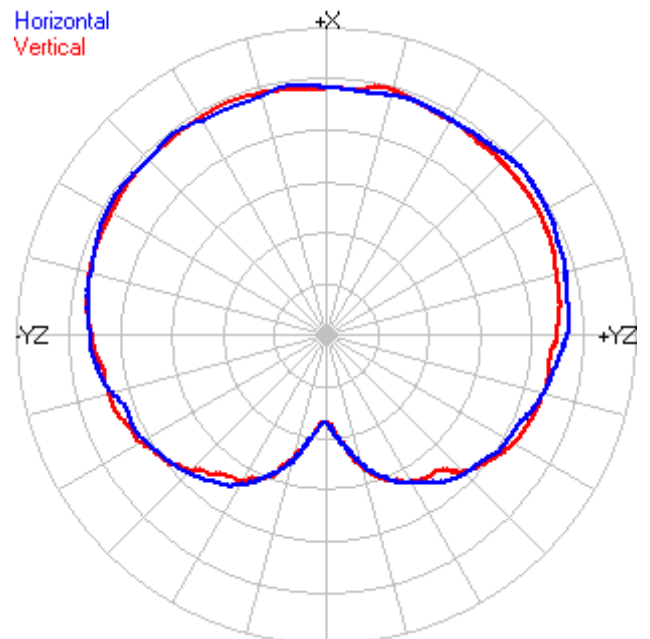

Note: The results start to be undesirable at 125Hz.

Note: At 160Hz, the "front" is not as strong as the "sides".

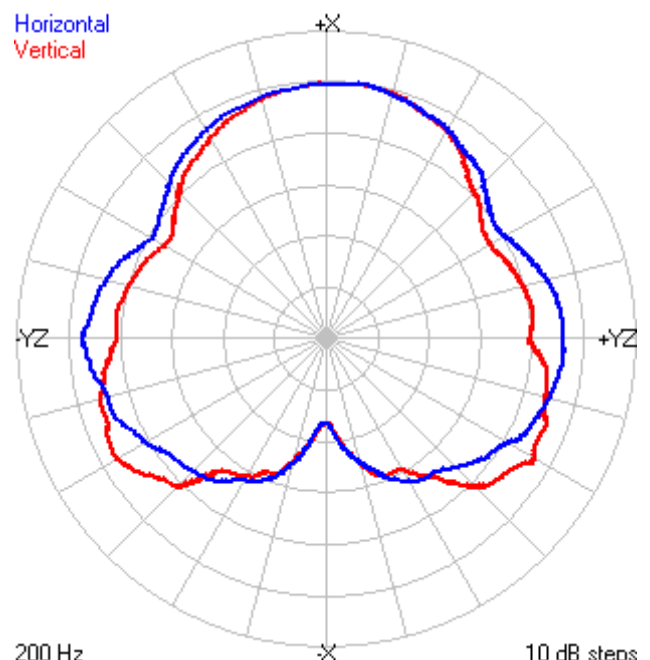

Note: At 200Hz, the results are mostly un-usable.

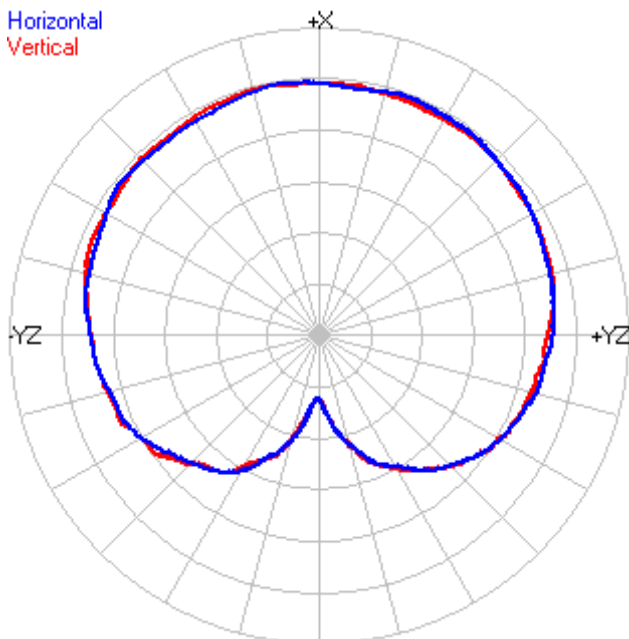

80 Hz 10 dB steps

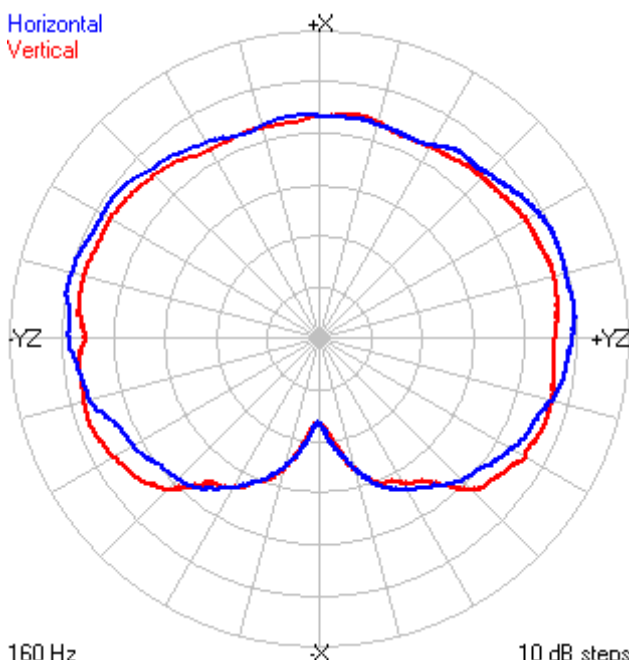

100 Hz 10 dB steps

125 Hz 10 dB steps

160 Hz 10 dB steps

200 Hz 10 dB steps
