Polar Focus Will Introduce Hot T.U.B. At Infocomm 2010

Polar Focus presents the Hot T.U.B. at Infocomm Booth Number C6525. A hot new product, the Truss Universal Bar is intended for speaker rigging on trusses with widths from 12" to 20 1/2 ". It uses 1/2" Cheeseborough type clamps for attaching to standard truss tubing of 1.9" to 2" O.D. tubing, allowing for the load to be placed front to back anywhere so the truss can be kept balanced. No more truss balance worries! Visit Polar Focus in Booth C6525 in the Audio Pavillion at Infocomm 2010!
