Ultimate Line Array Rigging

## ODA-YKV-SH96 Yoke System for Danley SH96

The ODA-YKV-SH96 is a three-piece yoke for the Danley SH96 speaker. The ODA-YKV-SH96 is installed quickly and cleanly. It is best used with the Polar Focus ZBH (Z-beam half) line or attached directly to a PY00-UJ-STEM Assembly. Either way, the ODA-YKV-SH96 is an efficient and infinitely adjustable mount for the Danley SH96 Speaker.

The yoke is shipped disassembled in its compact protective box providing savings in shipping and handling. This product is available in powder coat black, white, galvanized, and custom colors.

We offer a full line of audio rigging equipment for professional loudspeakers and line arrays.

Need help rigging, mounting or aiming your loudspeakers or line arrays? We can help!

Call us at (413) 586-4444.
